

## AI-13 Aluminum Table

### Look Good Linenless With The First Seamless All-aluminum Table Line

Mity-Lite's AI-13 Aluminum Tables offer superb functionality to meet 21st century expectations by incorporating versatility and strength into one seamless design. Unlike competitive offerings constructed of individual aluminum planks bolted together, AI-13's anodized one-piece table surface achieves a clean, sophisticated look with or without a brushed tabletop pattern, is maintenance-free, and provides a more sanitary surface.

Made entirely of aluminum (legs, support structure, folding mechanisms, and tabletop), AI-13 Aluminum Tables are 20% lighter than conventional folding tables, strong enough to hold more than 3,000 lbs, and are nearly 100% recyclable. Go Seamless. Choose AI-13.

### Features & Benefits

- Durable and lightweight; supports over 3,000 lbs (1,361 kg) yet weighs 20% less than a conventional folding table
- Seamless anodized table surface for a more sophisticated linenless look that is also maintenance-free
- Durable support structure with reinforced edges and corners won't rust, crack, warp, or dent
- Slender 2.5" profile cuts shipping and storage costs and allows for quicker set-up and takedown
- Sustainable all-aluminum design is nearly 100% recyclable
- Standard Duracorner™ withstands a 2 foot drop
- Sound-dampening standard on all tables
- Suitable for indoor & outdoor use
- Limited lifetime warranty
- Made in USA

### Upgrades

- Brushed Design—provides a high-end linenless appearance
- Color Match Corner—presents a monochromatic finish across entire table top surface
- Conference Leg—eliminates obstructions and allows for increased leg comfort
- Modesty Panel—available on any 72" or 96" rectangular table
