

Madera Table

Safer, maintenance-free & more durable than its plywood cousin Mity-Lite brings innovation to the folding table market through its patent-pending line of Madera Tables. The Madera Table line supports the durable lightweight attributes that Mity-Lite customers have come to expect. Available in a variety of shapes, sizes, and finishes, Madera Table surfaces are easy to clean, maintenance-free, and can be used without linens. Madera rectangular table corners are extremely durable due to a Mity-Lite high-impact design and can withstand a drop from 2 feet! Madera table corners are also replaceable if necessary. "Easy-grip" aluminum runners along the table's underside offer superior handling for fast but safe setup and takedown. The Madera Table outlasts the competition, especially in abusive commercial environments.

Product Features

- Durable structure supports 1,000+ lbs (454kg)
