

Durable Lightweight Furniture Systems

mesh•one™

ONE Chair For Every BODY

Incorporating a patented design, Mity-Lite revolutionizes portable seating with an incredibly durable, lightweight, and comfortable folding chair... Introducing Mesh•One™! Durably constructed in the USA from 16-gauge, cold-rolled steel, high-impact structural nylon, and commercial-grade “RipStop” mesh, Mesh•One™ is built to last and exceeds ANSI BIFMA standards*. Weighing 20% less than upholstered folding chairs from leading competitors, the Mesh•One™ folding chair is easy to handle and nests securely when stored. Mity-Lite replaces the uncomfortable qualities of traditional folding chair seats and backs with a breathable elastomeric mesh that until now, was used only on high-end business chairs. Mesh•One™ conforms to each individual’s unique shape, minimizes pressure points, and truly becomes the “ONE chair that fits every BODY”!

Product Attributes

Durable and Lightweight—Built to Last; Delivers Lower Lifetime Cost of Ownership

- Supports over 1,000 lbs—More than 100 times its own weight!
- RipStop mesh is tear, stain, fire, and abrasion resistant**
- Mesh seat & chair back housed in impact resistant structural nylon—Pound for pound stronger than steel!
- UV powder-coated steel—Scuff and scratch resistant
- Lightweight and easy to handle—Weighs only 10.7 lbs.; chairs nest securely when stored
- Made entirely in USA—10-year limited warranty
- Eco-friendly—Made from sustainable materials

Unsurpassed Comfort—A Viable Long-term Seating Solution

- Innovative elastomeric mesh—Evenly distributes weight, minimizes pressure points, and provides ergonomic back support for all body types!
- Breathability—Unique use of mesh improves airflow and comfort while sitting for extended periods of time
- Generous seat width—1.5 inches wider than standard folding chairs
- Waterfall seat front—Ergonomic leg relief prevents pressure points
